The above results are hypothetical and are intended for illustrative purposes only. The Hypothetical Growth of \$10,000 chart reflects a hypothetical \$10,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses, were deducted.

Unlike an actual performance record, hypothetical results do not represent actual performance and are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk. There are frequently differences, including material differences, between hypothetical performance results and the actual results subsequently achieved by any particular fund. Since trades have not actually been executed, hypothetical results cannot account for the impact of certain market risks such as lack of liquidity. There are numerous other factors related to the markets in general or the implementation of any specific investment strategy, which cannot be fully accounted for in the preparation of hypothetical results and all of which can adversely affect actual results.
