## Portfolio Strategy

BMO Europe High Dividend Covered Call Hedged to CAD ETF has been designed to provide exposure to a dividend focused portfolio, while earning call option premiums. The underlying portfolio is yield-weighted and broadly diversified across sectors. The Fund screens for securities for dividend growth, sustainability, and option liquidity. The Fund also dynamically writes covered call options. The call options are written out of the money and selected based on analyzing the option's available premium. The option premium provides limited downside protection. The foreign currency exposure is hedged back to the Canadian dollar.

## Fund Benefits

- Designed for investors looking for higher income from equity portfolios
- Invested in a diversified portfolio of high dividend European companies
- Call option writing reduces volatility
- Currency is hedged back to Canadian dollars
- Professionally managed by BMO Global Asset Management

<sup>2</sup> Beta is a measure of how a BMO ETF responds to moves in the broader market in which it invests. A beta of greater than 1.00 suggests that the ETF is more volatile than the market, while a beta of less than 1.00 suggests that the ETF is less volatile than the market. Beta may change over time and historical beta is not indicative of future beta. The indicated beta is generally based on historical rolling two-year returns. Where a BMO ETF does not have two years of performance history, the beta may be calculated as long as at least six months of performance history is available.
